PlanetMG especially Paul T, Debbie, Terence and Joanna / Leigh Allen

This album represents an on-going sonic journey that lies entrenched in a passion for breakbeats and groove oriented music. Taking in the sounds from early Hip Hop, 60s Motown music, 70s Rock and Latin and 90s Electronic music, this is my own version and vision of Drum & Bass, Down Tempo and Breakbeat, which sees a compound of those variant musical influences. After discovering the infinite creative possibilities of the sampler, I was immediately intrigued into developing an interest for weird textures and sounds that would otherwise be impossible to make without the sampler. Equipped with the tool to be able to deconstruct and reconstruct the sound I want, there is now no stopping the slicing and dicing up of audio bits. Pushing the boundaries of what is weird and "unmusical" mixed with cut up sounds and chopped up beats, Skrooloose serves up a blend of nostalgic influences combined with cutting edge sounds to take music into a new dimension.
