

**Title : Stardust Galactica**

**Composer : Esam**

**Lyricist : Esam**

And the sun rise in galactica as  
we leave you and I in our  
spaceship made of steel  
Stardust caused our eyes to  
bleed if i could blast us out of  
space with rocket  
fuel to last one day and should  
we die among the stars then I  
will hold you  
and asteroids are coming thru  
the radar could this be the end  
of all our dreams  
and all the spaceships in the sky  
technologies like you and I could  
never be  
reaching out for our beliefs
