

Title : Stardust Galactica

Composer : Esam

Lyricist : Esam

And the sun rise in galactica as
we leave you and I in our
spaceship made of steel
Stardust caused our eyes to
bleed if i could blast us out of
space with rocket
fuel to last one day and should
we die among the stars then I
will hold you
and asteroids are coming thru
the radar could this be the end
of all our dreams
and all the spaceships in the sky
technologies like you and I could
never be
reaching out for our beliefs
