

Title : When I Start To Sing

Composer : Danny

Lyricist : Danny

** When I start to sing
Hope that I will see
All the songs I made
Will bring you close to me
When I start to pray
I begin to hear
Someone's telling me
Just sing don't be afraid
Close your eyes, make it real
Let it come true, from your heart

Chorus:

Love is the word that I should say
Is the feel that count each day
In my heart, in my soul
From the day you start to smile at me
I pray the luck will be with me
I can win your heart and say
We can celebrate our happiness today
We can hold our hands together everyday
Now is the time, when I try the best to show myself,
So sing, sing out loud.

Repeat **

Love is the word that I should say
Is the feel that count each day
In my heart, in my soul
From the day you start to clap your hand for me
Words get in the way with the tears I say
We can celebrate our happiness today
We can hold our hands together everyday
When I start to sing a song for you today
